RUND Air Curtain

The decorative cylindrical

Decorative air curtain RUND, cylindrical in shape, is ideal for entrances and buildings where class, elegance and majesty is required.

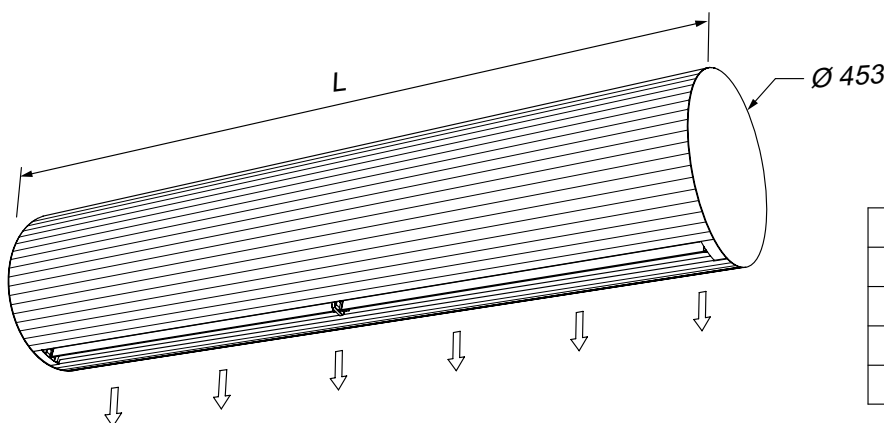

Vertically installed on one or both sides of the door; horizontally above the entrance or encompassing large distances, RUND air curtains integrate seamlessly with the surrounding environment as an architectural column element.

This air curtain has a wide range of accessories and configurations to suit any need that requires. With stainless steel cylindrical arms to the wall or ceiling, goalposts over the door, suspended with steel rods or vertical standing, versatility makes each installation “sui generis”.

With self-supporting steel frame panels and two designs of covers available: In faceted shape, or smooth. Finished in epoxy-polyester paint RAL 9016 white or gray RAL 9006 as standard. Other colors or stainless steel finishes available under request.

And now, as a great novelty, also available for RUND a wide range of innovative wraparound sheets with multiple patterns and textures, simulating architectural finishes such as stone, wood, marble or rustic metals.

Architectural integration had never been so perfect.
